

**Welcome to the Greenbush Virtual Academy (GVA) Middle School Program!** We are excited you are interested in this program and we hope this information will be useful in your decision process to enroll your child in GVA.

The GVA Middle School curriculum is provided by Edgenuity and EDynamic Learning. Your child's teachers will be highly qualified Kansas certified teachers residing in Kansas who will be available to tutor and facilitate your child's journey through their coursework.

The GVA Middle School curriculum is available for students in 6th through 8th grade. You will be amazed by the creative and engaging experiences offered through our interactive curriculum that includes Language Arts, Math, Science, Social Studies and many elective options that will interest your child.

Your child's teachers and Academic Coach will be available to also help you as you assist your child in their learning wherever your child is accessing their coursework. Your child's teachers and Academic Coach will be an invaluable resource for parents and will be able to provide assistance and guidance in ways to help your child be more successful.

In order to have a successful student experience, we recommend the parent/guardian monitor their child's progress closely. You will find a Progress Bar in each course. It shows your child's current progress and will show if a student is on track, ahead, or falling behind. The Course Map will display the activities your child needs to complete each day to stay on track to finish on schedule. You can request an emailed progress report daily or weekly and your child's teachers will contact you and your child often to provide feedback. Many assignments can be re-submitted based on teacher feedback to strengthen your child's mastery and to improve their score.

What online tools are available to help your child with lesson content? In their lessons your child will find many tools such as the ability to take digital notes, use an online glossary, and even read transcripts of the video instruction to ensure they don't miss key information. There are also subject-specific online tools such as calculators, formula sheets, and the periodic table. Your child will be able to access the text translation tool if needed where the text can be translated into one of over 60 languages. They can also highlight text and have it read aloud to them. Your child will have access to several reports that are helpful for staying on track and view their progress. They will have access to the Course Report, which serves as an assignment calendar as well as showing grades, and their Attendance Log, which keeps track of daily activities and time online.
